

## On-Site-Service

## Service description

In this service-package our mobile hard disk-shredder will come directly into your company.

The responsible staff can personally monitor the data destruction and otherwise they can document the data destruction process in written form with our colleague.

## You can choose between the following Service-Packages:

- **Standard-Service:** The destruction of data medium, which include data with normal protection requirements, will be effected with our shredder in processing stage 1. This shredder cuts the hard disks in small strips. The results are particle sizes between 300 mm<sup>2</sup> and 900

mm<sup>2</sup>.

The recommendation of the Federal Office for Information Security (German: BSI) is a particle size till 1,000 mm<sup>2</sup> after the destruction.

- **Premium-Service:** The destruction of data medium, which include data with high protection requirements, will be effected afterwards additionally with a secondary crushing through our shredder in processing stage 2. This shredder is equipped with a single shaft and an additional strainer insert. The results are particle sizes of max. 225 mm<sup>2</sup>.

The Federal Office for Information Security (German: BSI) recommends for hard disks, which include data with high protection requirements, a particle size till 300 mm<sup>2</sup> after the destruction.

Due the higher storage density of hard drives and storage media, it is recommendable to align the process to the smallest possible particle sizes in the mechanical hard drive destruction.

We reacted with our **PREMIUM SERVICE** to these guidelines and we are one of the first service providers on the market, who is able to implement these guidelines in an on-site-service for hard disks.

The responsible staff can **personally** monitor the data destruction and otherwise they can **document** the data destruction process **in written form** on the **data destruction certificate** with our colleague.

In addition, we can offer the possibility of a **video control** from the complete data destruction process. Our mobile vehicle is equipped with a video camera, which allows you to track the destruction in real time and you can load the **movie to an SD-card**

. After the destruction the film can be handed with the SD-card to you.  
The service fee for this service is available on request.

### **Price**

Hard disks will be charged by pieces

USB-Sticks, floppy disk, magnetic tape,
